

# *Letter of Recommendation*

From:

Norman Akana  
CH2MHILL  
2485 Natomas Park Drive.  
Suite 600  
Sacramento, CA. 95833

Diamond D General Engineering, Inc. (DDGE) has successfully completed the construction of Pleasant Grove Outfall Structure for the City of Roseville. As the construction manager of this project, I found Diamond D General Engineering's management staff and field staff to be a very professional company with quality at the top of their priorities. They are a team-oriented contractor that has an impeccable safety and QC record on this project. In spite of having numerous unforeseen conditions that had the potential for a significant amount of delays, DDGE overcame these conditions. DDGE worked with not only CH2MHILL but, the client as well to helping to meet scheduling, permit and budget issues.

The depth of knowledgeable staff, equipment, and supplier network allowed DDGE to not only perform this project but also keep it on schedule in spite of significant delays. Further more these same reasons allow DDGE to perform a variety of different types of projects, I would highly recommend DDGE for any project that they may pursue, and look forward to working with them in the future.

Sincerely,

A handwritten signature in cursive script that reads "Norman Akana".
